PROFILE

Technology Manager who designs and operates revenue systems: CRM, webinars, email/SMS, attribution, and conversational AI. I turn offers into funnels that media and sales can actually run. Ten years leading contact-center learning at TELUS International, then LinkedIn lead generation for US clients, now owning the marketing-technology stack at Digital Mavericks.

EXPERIENCE

Technology Manager

Jun 2024 - Present

Digital Mavericks Media · Remote

- Own marketing technology across multiple client brands: funnels, CRM, webinars, email/SMS, attribution, and AI follow-up.
- Build webinar-to-CRM automation in n8n and GoHighLevel: registrant and attendee sync, attendance-zone tags, CTA click tags, and no-show recovery so follow-up matches watch behavior.
- Design CRM data models that keep UTMs, landing-page URL, join/replay links, and engagement scoring intact from first click through close.
- Ship landing pages, VSL paths, application funnels, and booking calendars. Deploy funnel sites on Vercel with UTM pass-through.
- Run deliverability (DNS, DMARC, mailbox warmup, opener/clicker automations) and partner with copy, sales, and founders on tags, calendars, and member access.

Campaign Manager & Technology Specialist

Oct 2023 - Mar 2024

PrimeSync Solutions

- Planned and ran digital campaigns end to end: strategy, channel mix, cross-functional coordination, and performance review.
- Implemented and supported the marketing-technology layer (tooling, troubleshooting, process) so campaigns could launch and iterate without waiting on a separate IT queue.

Lead Generation

2018 - 2024

Mojo Global · United States (Remote)

- Delivered LinkedIn-first lead generation for US clients: profile positioning, targeted outreach, personalized messaging, and content that opened conversations.
- Built automated follow-up systems so campaigns stayed consistent after the first touch, and translated client offers into sequences sales teams could work.

Learning & Development

2017 - 2018

Awesome OS

- Designed and delivered training across needs analysis, curriculum, facilitation, e-learning, and evaluation to close skill gaps and lift performance.
- Integrated LMS and learning tools. Kept certification and compliance records current.

Senior Learning Specialist

Oct 2007 - Apr 2017

TELUS International

- Owned a customer-service and sales training portfolio serving national and international contact-center agents.
- Partnered with senior stakeholders on learning strategy, ran project plans and risk, and reported progress to operations.
- Used performance data to close skill gaps, designed learning solutions with adult-learning methods, and mentored national and international facilitators.

Administrative Clerk II

Dec 2005 - Oct 2007

Department of Justice · Makati City, Philippines

Supported administrative operations for a national justice office.

EDUCATION

Bachelor of Secondary Education (BSEd)

2003 - 2007

University of the Philippines · Teaching of High School Biological Sciences

CERTIFICATIONS

Applied Coaching System · Trainer Development (TELUS International) · Lean Six Sigma Yellow Belt · Essential Skills and Knowledge for Effective Contact Centre Management

SYSTEMS & TOOLS

CRM, funnels & webinars

GoHighLevel, StealthSeminar, Vercel, Vidalytics, Kit, Klaviyo, HTML/CSS landing pages, split testing

AI, voice & conversations

Conversation AI, Retell voice, objection logging, SMS/email follow-up, knowledge-base updates

Learning & process

Adult learning, curriculum design, facilitator coaching, Lean Six Sigma, contact-center performance, process improvement

Automation & attribution

n8n, Zapier, webhooks, UTM architecture, gclid/fbclid capture, custom-field data models, tagging taxonomies

Deliverability & ops

Warmy, SMTP/Mailgun, DMARC/DNS, sending-domain warmup, Asana, Slack, Google Workspace, Canva

Go-to-market craft

Offer ladders, VSL funnels, webinar zone scoring, lead magnets, application funnels, calendar and booking ops

SELECTED PROJECT

End-to-end revenue funnel

2024 - Present

Publish & Prosper · client brand at Digital Mavericks

Designed and operate the commercial spine for an AI-publishing offer: free tools and a masterclass into a VSL/cart and a high-ticket partner suite. One CRM, many entry points.

49	243	20+	7
n8n workflows in the stack	CRM custom fields, click to close	live funnel routes and tracking links	offer tracks, free tool to partner

- Offer ladder: free keyword tool and cheatsheet, masterclass, VSL/cart, high-ticket partner suite, JV affiliate program, multi-day challenge.
- StealthSeminar webinars with time-based attendance zones, CTA click tags, and no-show recovery so sales follow-up matches watch behavior.
- GoHighLevel data model (243 fields) covering UTMs, landing-page URL, join/replay links, attendance time, application answers, and engagement scoring.
- 49 n8n workflows connecting webinar events to CRM tags, Conversation AI (SMS/voice), payment links, pipeline moves, and booking. Migrated the legacy Zapier stack onto n8n.
- 15+ landing-page variants, a Vercel funnel site, domain and mail architecture, and mailbox warmup so campaigns can land.
- High-ticket path: webinar, 48-hour replay (email + iMessage), 12-question application, strategy-call calendar, with AI handling objections.
